Sapsama Group Limited

In this issue:

- New challenging project in Benin, Africa
- Reconstruction of Vasagatan in Stockholm
- One year ago since Sapsama AB takeover

Sapsama contracted by Charles Kendall UK

The US funded Millennium Challenge Corporation provides USD 375 million for the benefit of the Government of Benin in West Africa. Sapsama

has been engaged to provide procurement support for this project. The tasks include assistance in drafting tender documentation, provision of FIDIC procurement training, evaluation support services for construction contracts and assistance in negotiating contracts. The goal of the project is to reduce poverty in Benin by accelerating economic growth through investments in the electricity sub-sector. The entire project is expected to close in the summer of 2022, ending a 5-year project period.

Stockholmshem

is Stockholm's largest housing company. It has a very well-organised procurement department

We have had the great pleasure of assisting them with procurement support, as sub-consultants to our partner:

Reconstruction of Vasagatan in Stockholm

One of Stockholm capital's busiest inner streets, Vasagatan is now under reconstruction. Sapsama is proud to have provided procurement support as sub-consultants, to Stockholm City Council over the previous winter 2017/18. The procurement went smoothly, largely due to a very competent management from the City, in the form of its procurement expert, its project managers and other involved officials and consultants.

When the contract expired, the director of the procurement department told us that:

"You are unique, in that you possess in-depth knowledge and understanding about the subject for the procurements you are doing."

-Morgan Jansson

Sapsama AB takeover in 2017

Sapsama Group Limited took over all ongoing assignments from the Sweden-registered Sapsama AB exactly 1 year ago. More on these developments will follow in our next issue in 2019.

We take great pride in this acknowledgement.

The reconstruction of Stockholm's busiest street; Vasagatan is scheduled to be complete in 2021 with more bicycle lanes and increased traffic safety.
